Our Vision

Our vision is making technological advancement to give all people access to a better life. We believe we can only make this happen by upholding genuine universal values we all cherish on a daily basis and in all stages of life.

We have embedded these values into our culture, workflow and KPIs. We work as a team and deal with others with integrity, we deliver service excellence, and we seek success by working hard hand in hand in an open collaborative professional environment with our staff, our customers, as well as our vendors and suppliers. We build capacity by seeing the goodness in people. We build trust by trusting first

Our Mission

Our mission is to define and follow the roadmap in which we bring our vision into reality. Our customers spectrum is very wide with Critical Missions on their agenda. We use process excellence to strive for what we promise. Our organization is based on top-notch leaders who believe in our values in cultivating the right work environment in which our staff learn, and grow continuously as part of effective and closely-knit teams.

Our management encourages open communication to create an atmosphere in which ideas and opinions multiply. This culture enhances our work environment, allows mutual understanding, builds customer-centric teams, encourages innovation, accelerates discovery, improves productivity, and continuously fosters change. Change for more cohesive teams, seamless workflow, more advanced products at lower cost for our customers. Continuous change leads to something new every day, and that is what makes us happy, lively and attached to each other and to our company.

POSITIVE SOLUTION
Technology

CCTV Survelliance

The physical security of your business and the safety of your employees is one of the key concerns business owners and managers face today.

Closed Circuit Television (CCTV) systems have become the key element in securing important facilities and fixed assets. Positive Solutions Technology designs and installs complete CCTV systems including fully equipped control rooms as well as other security surveillance solutions. Intelligent Projects has successfully implemented some of large and small CCTV systems including analog and IP-based solutions
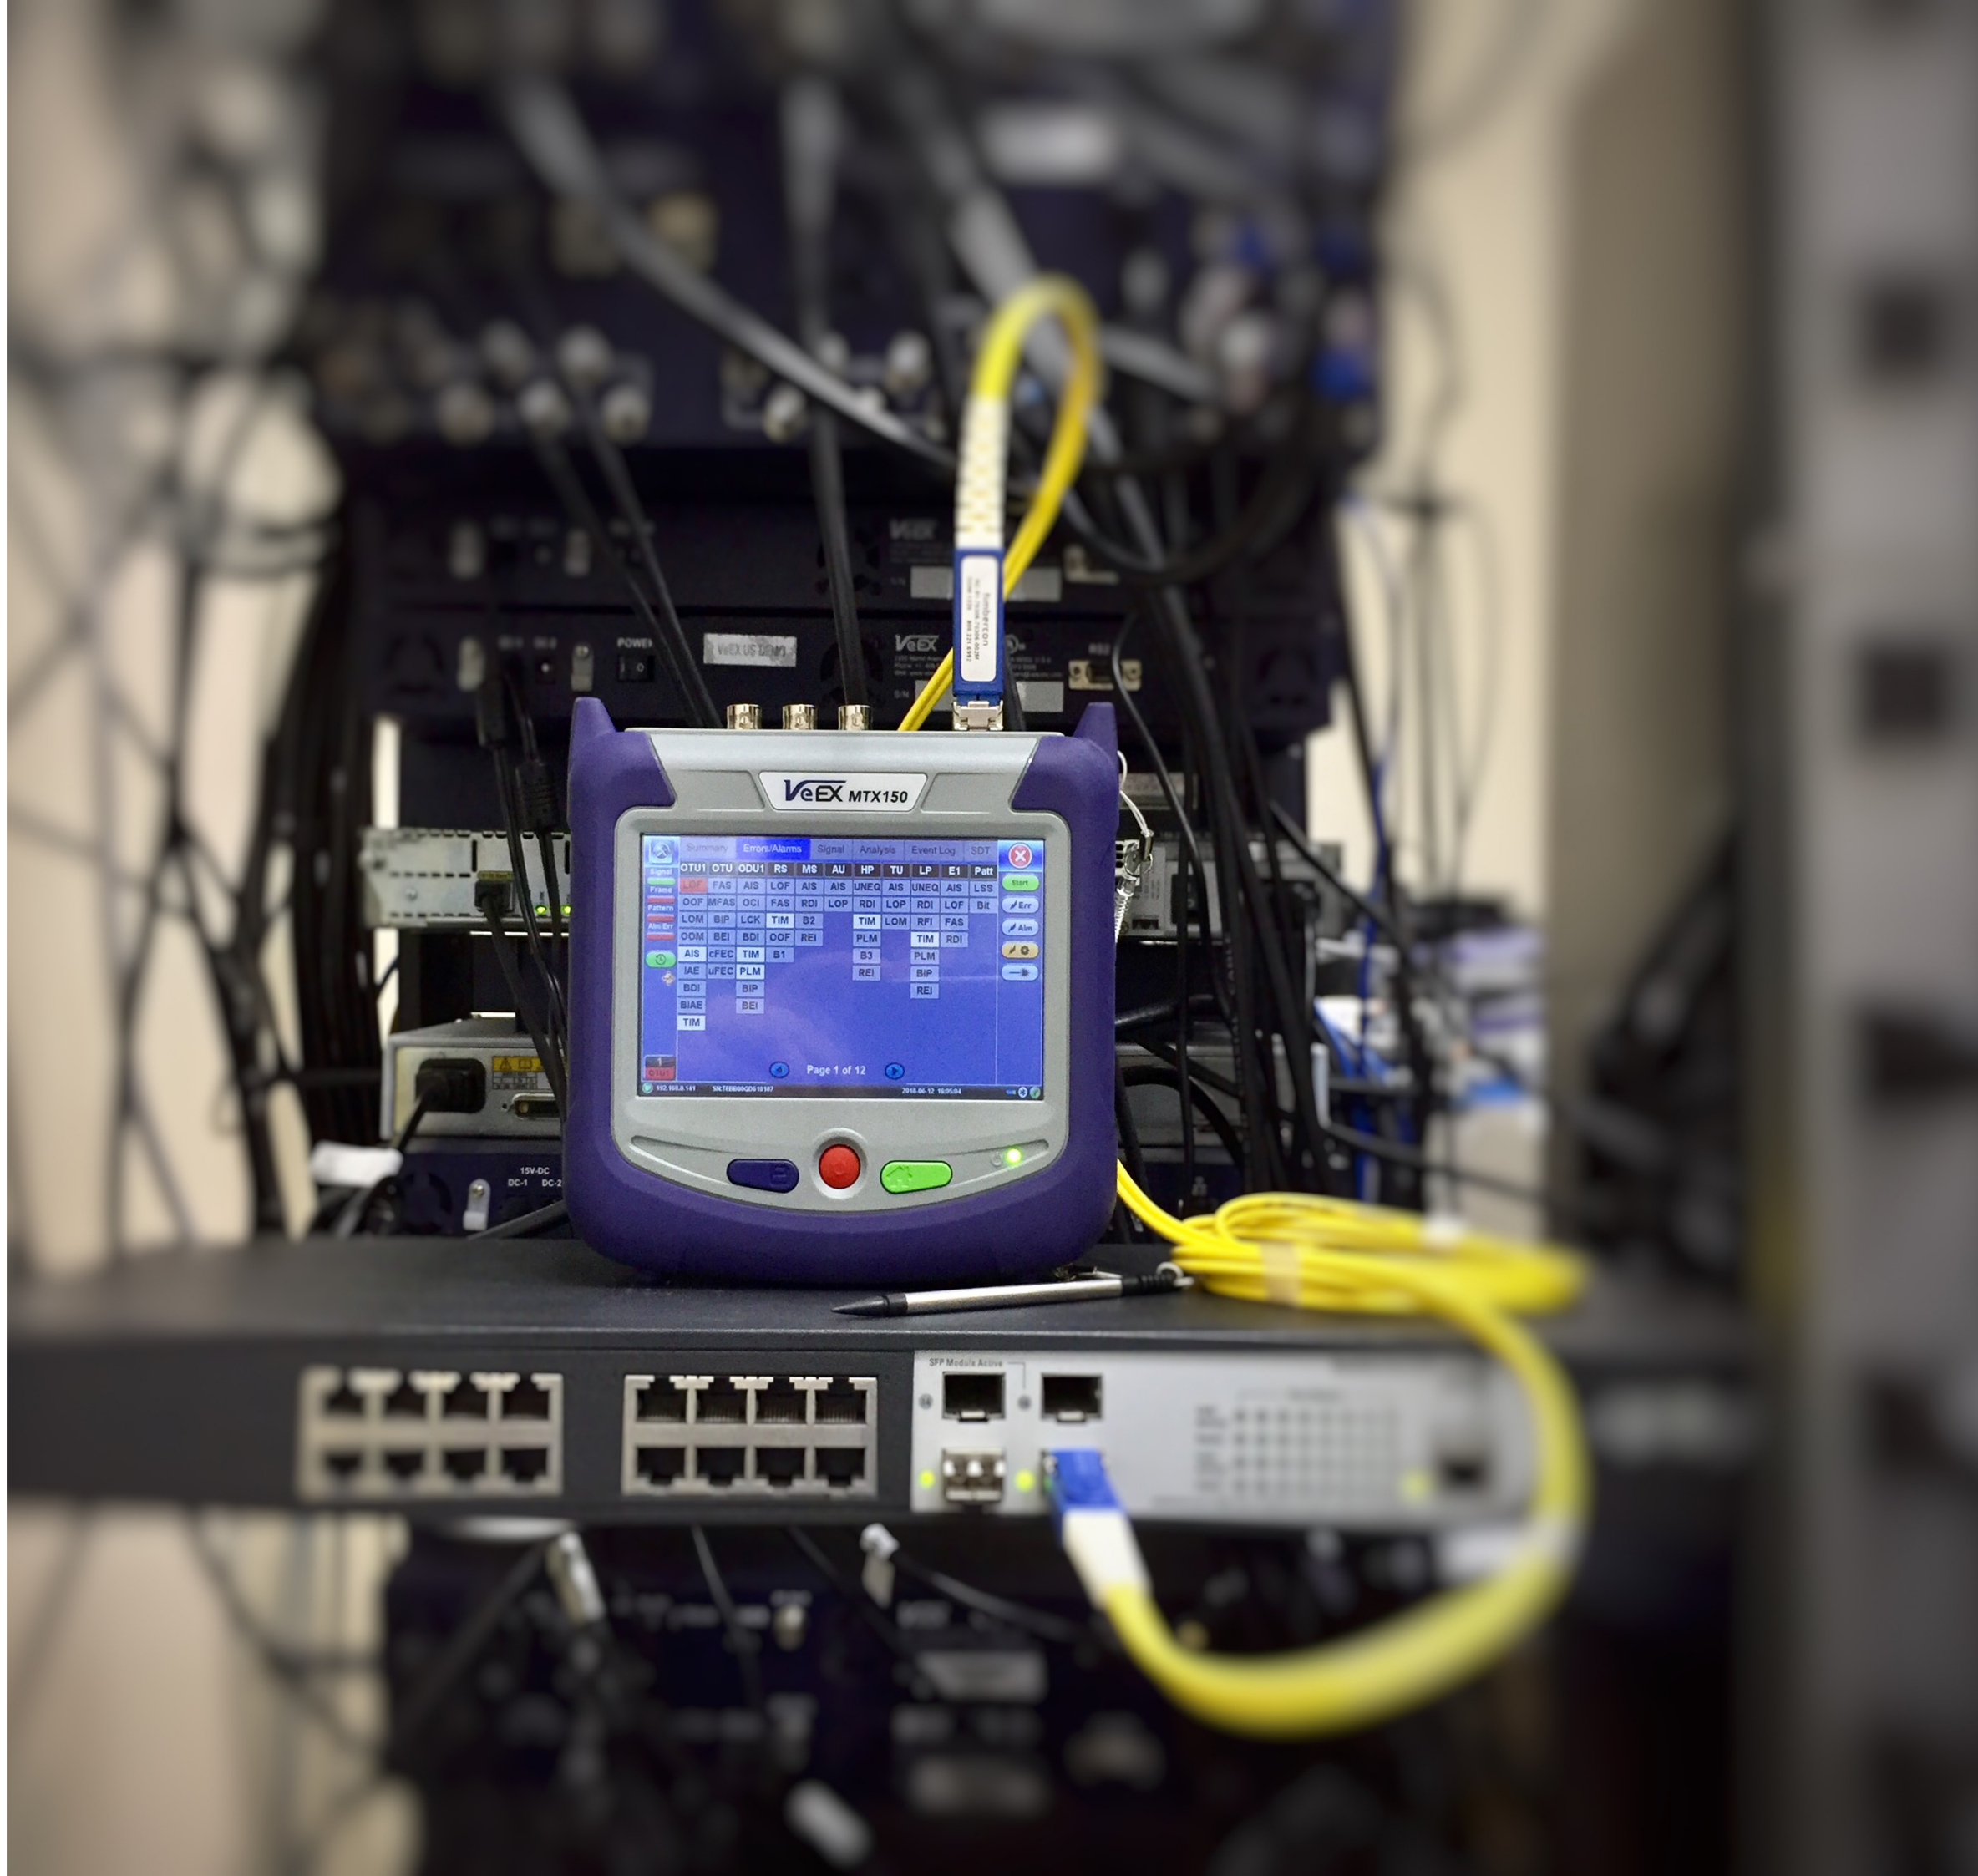

Access Control

Positive Solutions Technology also designs and implements various Access Control systems based on solutions from multiple vendors. We offer systems ranging from standalone card printers and readers up to complicated networked systems consisting of tens of card readers and various types of biometric recognition and identification devices, door controllers and other types of readers

Network
Solutions

A strong network foundation is the key to business agility and competitiveness in the technology-dependent Internet era.

Positive Solution Technology advanced network foundation from technology leaders such as Cisco provides the intelligent services, including availability and quality of service (QoS), which make it possible for companies to launch or optimize online applications, extend and manage operations more easily and streamline administration.

Our Software Solutions

Fleet Tracking & Management

In today's market, there is a low barrier to entry when starting a tracking company. Fortunately for you, a lot of these companies appearing overnight do not understand the industry, and are providing basic systems.
Using our platform, it will be easy for you to beat the competition by offering a system that is streets ahead of other systems and requires very little/no user training.

Restaurant / POS

Restaurant Point of Sale is Now Restaurant Point of Service. the restaurant POS system is where a customer makes a payment in exchange for goods or services. Payment terminals, touch screens, and a variety of other hardware and software options are used to enable the transaction.

ERP/CRM

Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) are similar in many ways, as they are both used to increase the overall profitability of a business. These systems overlap in some areas, and can be completely integrated in others.

Fully customized Software

specially developed for some specific organization or other user. As such, it can be contrasted with the use of software packages developed for the mass market, it will be developed for your specific requirements.
